

**\*\*For Immediate Release\*\***

26 June, 2020

Earlier today the March For Our Lives Texas State Director was notified of images circulating on news posts from the March For Our Lives Houston march in 2018. These images pose a false narrative that they are from the recent protests. These images were from our 2018 march, hence the lack of face coverings. We, here at March For Our Lives Texas and Houston, do not condone any use of these images to spread misleading information. We stand with the Black Lives Matter protests and believe in the mission they are fighting for. Our students and our movement shouldn't be used as scapegoats onto the pressing matters of the COVID-19 pandemic. If any photos from the March 24, 2018 event or any other event, which is not recent of ours, is used to spread this false message then we ask it to be removed or corrected.

Information can be found on our website and social media accounts across multiple platforms.
